### WORK EXPERIENCE

#### FullStack Developer (Nextjs, Scala, Kotlin)

Finteum

Jan 2022- current / Poland

- Helped rebuilding of Redux application onto Tanstack/query, and replacing forms with react-hook-form in 2 months.
- Restructured routing, resulting in a 10% improvement in application rendering, saving 2-4 seconds.
- Deeply studied such libraries as Tanstack/query+router, yup, react-hook-form, Dayjs and Moment.js
- Developed and optimized test suites with 15+ E2E and 300+ unit tests, utilizing Cypress, TestCafe, and Unit Testing (Jest) frameworks.
- Designed and implemented precise fee calculation service in Scala, including PDF generation and thorough test coverage.
- Studied in detail the scope of intraday trading in the banking sector

#### FullStack Developer (React, Node.js)

Targsoft

Aug 2020 - Dec 2022

- Built React MicroFrontend for claim tracking and document management in a 2-person team.
- Aided in implementing collaborative document editing via Remirror.js (Websocket).
- Developed impactful features in Apollo Server+GraphQL, enhancing project capabilities and UX.
- Created dozen of custom components in Storybook for a consistent UI and efficient development workflow.
- Had experience with Microsoft Fluent UI, Chakra and Ant libraries
- Was working with both microfrontends and microservices.
- Onboarded a new team member, aiding in his integration in the team.
